THE

ELECTRICAL WORLD

AND

ENGINEER

A WEEKLY REVIEW OF CURRENT PROGRESS IN
ELECTRICITY AND ITS PRACTICAL APPLICATIONS

VOLUME XLIII

FROM JANUARY 2 TO JUNE 25, 1904

NEW YORK:
ELECTRICAL WORLD AND ENGINEER

INDEX TO VOLUME XLIII.

GENERAL INDEX.

Entries from the Digest of Current Electrical Literature are indicated by D.(Digest) and D. R. (Digest Reference).

A

Accounting, Central station, 814, 1148, 1160
Accumulators. (See Storage batteries.)
Advertising methods, 1057
Aeroplanes, Elihu Thomson on, 265
Agriculture, Electricity in. By Guarini, (D.) 1033
Air:
——Conductivity of the air at high voltages. By Ryan, 471
——Electric discharges through air, Experiments, 913
——Electric rigidity of the atmosphere, 678
Allgemeine Electricitäts Gesellschaft. Three-phase transformers, *55
Allgemeine Electricitats Gesellschaft—General Electric combination, 728
Allis-Chalmers Co:
——Electric shop drive, *189
——Gas engine, *285
——Manufacture of electrical machinery, 301, 304, 410, 510
——Turbine contact, 1207
Alloys, Microstructure of, (D.) 409
Alternating-current apparatus, Standard practice in the use of, 223
Alternating-current diagrams. By Karapetoff, (D. R.) 828
Alternating-current measurements, Use of condensers in. By Penkert, (D.) 743
Alternating-current work in America, Development of. By Terry, 428
Alternating currents:
——Braun tube in the study of, *812
——Phase differences, *813
——Photographing wave form, 162; By Spencer, *169
——Principles of alternating-current engineering. By Gump, (D. R.) 828
——Recording and analyzing wave forms. By Hospitalier, (D.) *51
——Three-voltmeter method of measuring. By Nies, (D. R.) 146
——Wave form analysis. By Kintner, 1015, *1023
——Wave forms, 1015
Alternators:
——Ampere-turns, Calculation of. By Guilbert, *516, *556
——Direct excitation by alternating current. By Heyland, (D.) 101
——1500-K.W., for St. Louis, *885
——Historical notes. By Rushmore, 457
——Parallel operation of. By Bohle, (D.) 480, 613, 701, *1029; Koehler, (D. R.) 660; Sommerfield, (D.) 826, 880
——Properties of alternators under various conditions of loads. By Atchison, (D. R.) 1030
——Regulation of. By Hobart and Punga, 819
Lahmeyer & Co.'s method, (D.) 990
Predetermining. By Torda-Heymann, (D.) 916
Use of three-phase diagram. By Niethammer, (D.) 880
——Sinusoidal e.m.f. By Paterson, (D.) 369
——Testing large alternators, 5; By Burnand, *15
——Theories. By Pulsig, (D. R.) 405, 480
——Voltage regulation. By Meyer, (D.) 529, 575, *615
Aluminum:
——Corrosion of. By Mott, (D.) 704
——Electroplating. By Burgess and Hambüchen, (D.) 482
——Hardening, 327
——Manufacture and uses. By Wilson, (D.) 146
——Production process proposed by Gin. By Bennie, (D.) 742
——Solder for, (D.) 332
——Welding. By Cowper-Coles, (D.) 105
American Association for the Advancement of Science, Annual meeting, 88
American Electric Fuse Co., 1209
American Electrochemical Society, Meetings, 322, 480, 548, 732
American Institute of Electrical Engineers:
——Annual dinner, 120, 164, 208, 253, 256, 345, 349
——Annual meeting, 904, 937, 979
——April meeting, 819, 873, 1027
——Building fund, 367
——Chicago meeting on storage batteries, 177
——Destruction of property by fire at printing office, 120
——Edison medal, 76
——February meeting, 471, 571
——High-tension work, Discussion of, 563
——I. E. Congress Reception Committee, 680
——January meeting, 273
——June meeting, 1114
——March meeting, 563, 634
——Transactions, Small volume of, 1184
American Society of Civil Engineers and the Union Engineering Building, 205, 422
American Society of Mechanical Engineers, Chicago meeting of, 1086
American Street Railway Association, Convention at St. Louis, 738
American Telephone & Telegraph Co., Annual report, 632, 654
Ammeters:
——Adjustable sensitiveness. By Fuessner, (D.) 483
——Hot-wire. By Fleming, (D.) 994
——Optical. By Orlich, (D.) 829
Ampere-turns, Calculation of. By Guilbert, *516, *556, *603
Anaheim Mutual Water Co., California, 720
Andrae, Julius, & Sons Co. Underground distribution box, *1004
Ansonia Brass & Copper Co. Cable, *1038
Anyun Lamp & Electric Co. Oil fuse, 63, *621
Apprentices, Training, in engineering works. By Downton, (D.) 52
Arc, Electric:
——Carbon electrodes. By Blondel, (D.) 279
——Hall effect. By Child, (D.) 918
——Ionic theory. By Stark, (D.) 50
——Magnetite arc. By Steinmetz, *974
——Mercury and carbon electrodes. By Cassudo, (D.) 1090
——Mercury vapor, (D. R.) 280
——Metallic oxides, Arc between. By Stark, (D.) 530
——Study of the electric arc, 734
——Theories. By Stark, (D.) 330
——Three-phase arcs, (D. R.) 991; By Mercanton, (D.) *369
——Voltage loss. By Schulze, (D.) 330
Arc lamp department, Organization and equipment of, 1054
Arc lamps:
——Climax, *884
——Differential lamp. By von Zudnochowski, (D. R.) 880
——Early days of the Brush arc light. By Hamill, 473
——Early history. By Bell, 436
——English open lamps, *487
——Evolution of the enclosed arc. By Marks, 448
——Finsen lamps, 594
——Heany, *286
——Jablochkoff candles, 171
——Magnetite arc lamp. By Steinmetz, *974; Holmes, 1053; Murphy, 1127
——Photochemical purposes, (D.) 279
——Photometric measurements of lamps giving light in a certain direction. By Richter, (D. R.) 530
——Photometric tests of street lamps by Bradley, (D.) 50, 660
——Series and multiple systems for streets, 817
——Triplex lamps. By Hoppe, (D.) 369
——Warner series enclosed, *494
——(See also Lighting.)
Architecture of electrical works, (D) 778; 1184
Armature diameter of induction motors, 163; By Hobart, 170
Arnold electro-pneumatic railway system, 2; By Arnold, *25
Arrhenius, Savante, (D. R.) 577
Association of Railway Telegraph Superintendents, 1206
Atmosphere. (See Air.)
Atoms:
——Dielectric capacity of. By Sutherland, (D.) 881
——Structure of. By Thomson, (D.) 576; Nagaoka, (D) 1092; 1185
Automatic devices, The development of, (D.) 531
Automobile Club annual dinner, 208
Automobile Engineers' Society, 219
Automobile Manufacturers, National Association of, 241
Automobile parade in New York, 832
Automobile Show, New York, 161, *193, *195
Automobiles:
——Electric automobiles, 902
——General Electric, *195
——Long distance record, 47
——Record run by F. B. Whitney, *105
——Service tests of motor wagons, 397, 659, *730
——Trucks for delivery work, Brewer's experience with, 227
Automobiling reminiscences. By Smith, 466

B

Balances, Shielded. By Campbell, 633, *647, 740
Baltimore fire, 345, 348, *364, 533
Barnes, W. F., & John, Co. Drill, *242
Barney & Smith Car Co., *619
Batteries. (See Primary batteries; Storage batteries.)
Battery Supplies Co. Primary battery, *1137
Baylis Co. Reaction brush holder, *1003
Beardsworth Engineering & Machinery Co., 196
Bearings, Electric resistance of. By Zorawski, (D.) 777; Dettmar, (D. R.) 879
Bell telephone system, Annual report, 632, 654
Benjamin Electric Mfg. Co.:
——Clusters, *490, *786
——Socket, *536
Berg, F., & Co., Electric heating equipment. By Loewenthal, *235
Bismuth and tin alloy, Thomson effect in. By Laws, (D.) 1093
Bissell Co. Conduit rods, *1038
Blast furnace lifts, Electric. By Schiebler, (D.) 880
Blue printing with enclosed arc lamps, *787
Bogue, C. J. Low-voltage generators, *411
Boiler room practice. By Edwards, (D. R.) 481
Boilers:
——Competitive tests by Pacific Light & Power Co., Los Angeles, (D. R.) 1166
——Milne water tube, *832
——Scale troubles, 815
——Thermal storage system, (D) 1202
Book reviews:
——American Meter Practice. By L. C. Reed, 1094
——American Street Railway Investments, 1169
——"Annuaire" for the year 1904, 664
——Anwendung der Elektrizitat für Militarische Zwecke. By Friedrich Wachter, 1033
——Anwendung und Zukuft der Kondensatoren in der Wechselstromtechnik, 1094
——Aufgaben aus der Elektrotechnik nebst deren Lösungen. By P. E. Müllendorff, 705
——Chemins de Fer Electriques. By Henri Marechal, 781
——Congres de la Houille Blanche, 994
——Cours D'Electricité. By H. Pellat, 663
——Cyanid Prozesse, 1094
——Distribution de l'Energie par Courants Polyphases. By J. Rodet, 234
——Dizionario Tecnico in Quattro Lingue, 830
——Drehstrom motor, Der. By Julius Heubach, 188
——Dynamo, The. By C. C. Hawkins, 105
——Elasticity and Resistance of the Materials of Engineering. By W. H. Burr, 333
——Elektro-Akustische Untersuchungen. By Robert Hartmann-Kempf, 1130
——Elecktromechanische Konstruktionselemente. By G. Klingenberg, 884
——Electrical Engineering Experiments and Tests of Direct-Current Machinery. By G. F. Sever, 994
——Electricity and Matter. By J. J. Thomson, 781
——Elektrische Apparate für Starkstrom. By G. J. Erlacher, 400
——Elektrische Lichtbogen. By Julius Springer, 188
——Elektrometallurgie der Alkalimetalle. By H. Becker, 920
——Elemente der Elektrochnik. By Moriz Kohn, 484
——Elements of Electromagnetic Theory. By S. J. Burnett, 333
——Elettrochimica. By I. F. Villani, 921
——Free-Hand Lettering. By V. T. Wilson, 920
——Gas Engine. By F. R. Hutton, 282
——Grundriss der Reinen und Angewandten Elektrochemie. By P. Ferchland, 883
——Herstellung der Akkumulatoren. By F. Grunwald, 781
——Herstellung von Metallgegenstanden und die Elecktrogravure. By W. Pfanhauser, 705
——Laboratory Exercises. By K. E. Guthe, 188
——Luftverunreinigung und Ventilation. By Josef Rambonsek, 883
——Messungen an Elektrischen Maschinen. By Julius Springer, 484
——Moderne Gesichkpunkte für den Entwurf Elektrischer Maschinen und Apparate. By F. Niethammer, 744
——My Air Ships. A. Santos-Dumont, 617
——National Electric Light Association, 831
——Notes on Electric Railway Economics and Preliminary Engineering. By W. C. Gotshall, 53
——Phénoménes Foundamentaux et Principales Applicatiöns du Courant Alternatif. By R. Swyngedaum, 884
——Ready Reference Tables. By Carl Hering, 1205
——Rubber, Gutta-Percha and Balata. By Franz Clouth, 1094
——Steam Boilers. By H. DeB. Parsons, 883
——Story of the Atlantic Cable. By Charles Bright, 744
——Technical Mechanics. E. R. Maurer, 830
——Tecnica delle Correnti Alternate. By Guiseppe Sartori, 617
——Telegraphie Sans Fils. By André Broca, 1033
——Text-Book of Electrical Machinery. By Ryan, Norris and Hoxie, 188
——Theorie und Anwendung des Elektrischen Bogenlichtes. By H. Birrenbach, 1033
——Theory of the Lead Accumulator. F. Dolezalek, 1169
——Transactions of the American Electrochemical Society, 830
——Treatise on Friction and Lost Work in Machinery and Mill Work. R. H. Thurston, 830
——Truth About the Trusts. By John Moody, 781
——Universal Electrical Directory, 617
——Vorlesungen über Technische Mechanik. By Aug. Foppl, 883
——Whittaker's Electrical Engineer's Pocket Book. By Kenelm Edgecumbe, 920.

*Indicates illustrated articles.

130770

Book reviews: (Continued.)
——Wireless Telegraphy. By Wm. Maser, Jr., 484
——Wireless Telegraphy. By C. H. Sewall, 484
Booster, Automatic reversible, Leicester, Eng., railway, (D.) *1166
Booster calculations. By Del Mar, 677, *687
Boston Edison system, Expansion of, *941
Bowers, W. L., Portrait of, *818
Bowker, R. R., Lines written by, 352
Bracket, Telephone card index, *238
Brake, Electromagnetic track, *665
Brass, Removing from iron. By Burgess, (D.) 281
Braun tube in the study of alternating currents, *812
Briggs, W. W. Alternating current crane, *783
Bristol Company. Thermometer-thermostat, *1136
British Thomson-Houston Co. Track brake, *665
British Westinghouse Electric & Mfg. Co.:
——Annual report, 63
——British Trade Union, 579
——Dock contract, 581
——Statements, 392
Brown, Boveri & Co., 386
Brown, Glifford H., & Co. Silvered mica condensers, *997
Brush holder, Reaction, *1003
Brush lighting plant in Boston, 1887, *961
Burne-Jones, Sir Philip, on telephony and electric light in New York, 1164
Burt Mfg. Co. Oil filter, *1039

C

C. & C. Electric Co. Dynamos and motors, *488
Cable calculator, Callender, (D.) 1203
Cable clip, Hoffman, *272
Cable hanger, Villard & Copeland, *525
Cables:
——Ansonia copper, *1038
——Calculating capacity of overhead lines and cables. By Lichenstein, (D.) 482, 531
——Construction and manufacture. By Schmidt, (D.) 233, 828, 1128
——Eddy currents in cable sheaths. By Field, (D.) 881, 917, 993
——Hauling-in machine, 665
——Installation of electric cables, 650
——Losses in high-tension. By Roth, (D.) 103
Cables, Submarine:
——Activity in the Far East, 1111
——Breaks in, Localization of. By Davidson, (D. R.) 333; (D. R.) 780
——German, Second, 1148
——German-American, 853
——P. I. to Japan, 478
——Pirelli & Co., Milan, (D.) 482
——War messages, 644
Cables, Underground, Johannesburg, South Africa, (D. R.) 103
Cableways, Electric:
——In metallurgical plants, (D. R.) 1127, 1167
——Over the Zambesi River, (D.) 917
Calcium carbide:
——Experimental process for making. By Moissan, (D.) 828
——Producing chemical compounds, 771
Calcium carbide furnace, *225, *821
Calculator board for various purposes. By Raymond-Barker, (D. R.) 781
Calibrating standard voltmeters and ammeters, 74
Calomel electrode. By Ley and Heimbucher, (D.) 993
Canada, Municipal ownership in, 1164
Canadian Electrothermic Commission, 271
Canadian Westinghouse Company's new plant, *1208
Canals, Electric traction:
——Erie, 208
——Telton Canal in Germany, (D.) 232
Cancers cured by:
——Radium. By Walsh, (D.) 617
——Zinc ions. By Leduc, (D.) 333
Candle-power and temperature. By Eisler, (D.) 660
Capacities, Comparison of. By McClelland, (D.) 829
"Captains of industry in the electrical field." By Woodbury, 453
Car lighting. (See Train lighting.)
Carbon resistances. By Gray, (D.) 372; Stevenson, 527
Carhart, H. S., Portrait of, *732
Carlisle & Finch Co.:
——Gas engines, *242
——Lighting set for small yachts, *621
Cars:
——Arnold electro-pneumatic railway system, *29
——Barney & Smith parlor car, *619
——Berlin, Ger. By Schiff, (D. R.) 778
——First electric street car in America. By Bentley, *439
——Measuring instruments on special car in Berlin. By Bjoerkegren, (D. R.) 407
——Petrol, in England, (D.) 917
——Swiss tram cars. By Herzog, (D. R.) 280
Central station management, 814, 1148, 1160
Central stations:
——Architectural design of, (D.) 778; 1184
——Auxiliary business for central stations, 1113
——Bloomsburg, Pa., A composite plant. By Levy, *301
——Boston Edison system, Expansion of, *941
——Bradford, England, (D.) 103
——Caffaro, Italy, 100
——Center-of-distribution law. By Diamant, 302, 311
——Chesterfield, England, (D.) 482
——Coal consumption. By Giles, (D.) 406
——Cologne. By Overmann, (D.) 331
——Columbus Power Co., Columbus, Ga., *165
——Combined steam and waterpower at Richmond, *77
——Condensed steam in central economics. By Parkinson, (D. R.) 102
——Cost of steam plants, 1016
Central stations: (Continued.)
——Design of power stations. By Merz and McClellan, (D.) 991, 1030, 1090; (D. R.) 1128
——Dublin, Three-phase working in. By Brew, (D.) 407
——Durban, South Africa, (D.) 50
——Economy in minor station supplies, 1055
——Emergency switch for central stations. By Thornton, (D.) 407
——Expansion and changes of electric light and power systems. By Adams, 443
——Fire risk, 679, 1169
——France, Developments in. By Bloch, (D.) 406
——Frankfort-on-Main, (D.) 331, 575
——Garvin's Falls, N. H., *1017, *1071
——Gas engines in, (D.) 280, *517, 1055; By Bibbins, 90
——Germany, Statistics, (D.) 144
——Gt. Britain, Statistics, (D.) 371
——Graphics in power house location. By Diamant, 303, 311
——Increasing the output of lighting plants, 818
——Innsbruck, Austria, (D.) 50
——Italy, Alta-Italia Co. By Bignami, (D.) *741
——Kansas City Electric Light Co. By Barth, (D.) 1167
——Kruman, Austria, (D.) 50
——Leicester, Eng., municipal railway, *1078
——London:
Central Electric Supply Co., (D.) 1091
First incandescent lighting station, at London. By Hammer, 452
Hackney, (D.) 661
Sunderland, (D.) 742
West Ham, (D.) 779
——Meriden, Conn., (D.) 103
——Montreal, Frequency changers at. By Behrend, *308
——New England station development, *952
——Paris, Est-Lumière Co. By Dupuy, (D.) 828
——Philadelphia. By Eglin, *423
——Port Huron Light & Power Co. By Davidson, *681
——Rates. (See Charging for electrical energy.)
——Richmond, Va., Combined steam and water power, *77
——Riva, in the Tyrol. By Koster, *33
——Sant Mortier, France. By Koster, *761
——Seattle, Wash. (D. R.) 280; By Heine, *387
——Small plants for towns and summer resorts, (D.) 917
——South Norwalk, Conn. By Winchester, *364, 573, 659
——Stepney Borough Council Works, (D.) *331
——Storage batteries in, 223, 816
——Swindon, England, (D.) 408
——Three-phase working at Dublin. By Brew, (D.) 407
——Underground work, History of. By Langton, 455
——Vallorbe, Switzerland, (D. R.) 370
——Valtallina Ry., Italy. By Fumero, (D.) 186
——Water power stations. By Adams, (D.) 827
——Yorkshire Electric Power Co., (D.) 50
——Zanesville, Ohio, *549
——(See also Isolated plants; Transmission plants; Water power plants.)
Charging for electrical energy. By Schoenborn, (D.) *1092
——Double tariff at Cologne. By Overmann, (D.) 331
——Meters, Success of, 816
——Principles of uniform meter rates and of two-rate meters. By Crapper, (D. R.) 103
Charging panel, Electric automobile, *1040
Chicago Electrical Association, Meeting of Jan. 8, 139
Chicago Electrical Association merges with Western Society of Engineers, 386
Chicago Fuse Wire & Mfg. Co. Switch boxes, *336
Circuit breakers:
——Hartman oil, *666
——New design. By Bruell, (D.) 828
——Reverse current, for generators in parallel, *107
——Westinghouse carbon-break, *372
——Wiring circuit breakers. By Gough, (D.) 1128
Coal, Combustion of Iowa, 815
Coal consumption in central stations. By Giles, (D.) 406
Coal conveyor at Boston Edison station, *948
Coal-cutting machines, Electric in British mines, (D. R.) 406
Coal handling machinery. By Dawson, (D. R.) 282
Coherer, Bose, 699
Coin-Counting and wrapping machine, Motor-driven. By Van Winkle, *577
Collector for single-phase cars, (D.) 482
Columbus Power Co., Plant of, *165
Comet tails, (D.) 1032
Commercial Electric Co.:
——Generators for gas engine plants, *1174
——Variable speed motors, *493
Commutators:
——Device for truing, *1100
——Making of. By Mason, (D. R.) 101
——Sparking, Electric causes of. By Pichelmayer, (D.) *184
Compass, Early references to the. By Brother Potamian, *514, 562
Condensers:
——Electrolytic, 734
——Silvered mica, *997
Conductivity and electrostatics. By Von Nicolajew, (D.) 918
Conductivity and fluidity. By Hosking, (D.) 1167
Conduit rods, Bissell, *1038
Conduits, Underground, Springfield, Mass., *952
Coney Island lighting system, 1003
Connecticut Telephone & Electric Co., 787, 1004
Cooley General Development Co. Rotary engine, *1169
Controllers:
——Adjusting car resistances. By Gough, (D. R.) 881
——Crane controller, *1209
——Raworth regenerating system of car control, (D.) 992
——Regulating and reversing, for cranes, etc., *492
——Regulating and reversing for machine tool service, *834
Convection currents, Magnetic effect of. By Gutton, (D.) 576
Converters. (See Transformers.)
Conveyors:
——Coal conveyor, Boston Edison station, *948
——Terminal freight conveyors, *61
——Two-belt system, Ridgway, *1134
Copper:
——Alloys of, and cuprous oxide. By Hofman, Green and Yerxa, (D.) 532
——Analysis of. By Browne, (D. R.) 332
——Electrodeposition of. By Cowper-Coles, (D. R.) 104
——Electrolytic process for mining copper from the ores. By Thompson, (D.) 1129
——Extracting from ores. By Jones, (D.) 1167
——Extraction by electrolysis, 821
——Extraction from comminuted mineral mixtures, 658
Copper refinery, Economic balance and electrical losses in an electrolytic, 734; By Hutchinson, (D.) 233
Core, Localizing faults in Hoopers india rubber. By Ohlson, (D.) 187
Cornell University, Early electrical days at. By Anthony, 453
Coupling, Electromechanical, for generating units. By Gasnier, (D.) 405
Crane Co. Pop safety valves, *1039
Crane controller, Allen-Bradley, *1209
Cranes, Electric, (D.) 702; By Reichwold, (D. R.) 1030
——Coal-distributing crane, *22
——Gantry, Lackawanna Steel Co., *20
——Government printing office, *13
——Lloyd ship works, Triest. By Kann, (D. R.) 778
——Metallurgical furnaces, Russia. By Kueppers, (D. R.) 50
——100-ton alternating-current. By Briggs, *783
——Quay cranes. By Cunningham, (D. R.) 917
Crescent Co. Lamp guard, *495
Crosby, Oscar T., an electrical engineer in Thibet, 658
Crossing of signalling and high voltage circuits. By Knowlton, *768; Chetwood, Jr., *968
Cumberland Telephone Co., Evansville, Ind., 822
Curie, Mme., and radium, 32
Current, Lost and unaccounted for. By Humphrey, 1195
Currents, Sine. By Ruedenberg, (D.) 777
Curves, Theoretical determination of power. By Berry, 206, *215; Heftler, Parker, Freedman, Jones and Stowe, 725
"Cut-Meter," *886
Cut-outs in generator circuits. By Garrard, (D.) 102; Andrews, (D.) 232
Cutler-Hammer Mfg. Co. Theatre dimmers, *928
Cutter Co.:
——Charging panel, *1040
——Circuit breaker, *107

D

Dam in Chattahoochie River at Columbus, Ga., *167
Damping device, Barber. By Fabé and Carpenter, (D.) 1032
Damping of oscillations. By Kowalski, (D.) 233
Diastroloscope. By Charrie, (D.) 744
Die holder, Automatic, *1174
Dielectric capacity of atoms. By Sutherland, (D.) 881
Dielectric constants. By Schlundt, (D.) 616
Dielectric constants of solvents and solutions. By Eggers, (D.) 332
Dielectric hysteresis. By Beaulard, (D.) 233
Dielectric strength. By Baur, (D.) 233
Discharges:
——Discharges through gases. By Kowalski, (D.) 234
——Streamers or side discharges from electrodes. By Dell, 722
Distribution box, Underground, *1004
Doherty medal competition, 310
Dredges, Electric, in California. By Clark, *579
Drill, Barnes upright, *242
Drilling:
——Electrolytic drilling. By Cowper-Cowles, (D.R.)
——Power absorbed in drilling. By Norris, (D.) 231
Drilling machinery, Electric. By Perkins, (D.) 330
Dynamos:
——Auxiliary poles for direct-current machines. By Punga, (D.) 369
——C. & C., *488

Walmsley, Dr. R. M., on American engineering schools, (D.) 533; 592, 700
Wanamaker Store, New, 832
Ward Leonard Electric Co.:
——Ceiling fan controller, *1174
——Interchangeable resistances, *1100
——"Leak boxes," *581
——Locomotive, *565
——Motor starter, *335
——Rheostat, *1002
——Resistance coils, *196
——Resistance units, *495
——Rheostats, *535
Warner Instrument Co. Speed indicator, *886
Warner series enclosed arc lamp, *494
Water:
——Dielectric constant of. By Vonwiller, (D.) 1204
——Sterilizing by ozone, *361
Water, Sterilizing by ozone, *361
Water pipes, Thawing frozen by electricity, 307, 477; By Avery, 527; 533; Bell, 646; 744
Water power plants. By Adams, (D.) 827
——Austria, Developments in, (D.) 50
——Austrian plant on the River Mur. By Boemendal, (D.) 574
——British Columbia, (D. R.) 50
——Bull's Bridge, Housatonic River, High-pressure power, 301, *305
——Development of small water powers. By Bell, (D.) 185
——Elliott's Falls, Ontario. By Fitch, *642
——Garvin's Falls, N. H., *1017, *1071
——Greece, First hydroelectric plant. By Guarini, (D. R.) 330
——Kubel plant, Switzerland. By Collishonn, (D. R.) 575, 614
——Mont Cenis, Italy, (D.) 1855
——New England electric stations, *956
——Niagara Falls. By Buck, (D. R.) 50
——Richmond, Va., *78
——Riva, in the Tyrol, New electrical generating plant. By Koster, *33
——Saint-Berou, France. By Domar, (D. R.) 280
Water resistance. By Morcon, (D.) 615
Watt, James, Memorial to, 525
Wattmeter testing set, Alternating-current, *62
Wattmeters:
——Brush-Gutmann alternating-current integrating, (D.) 1093
——Choice of. By Howe, 141; Davis, 521
——Expression for the torque of a polyphase. By Stowe, *1022
——Fort Wayne single-phase, *785
——Integrating alternating-current, (D.) *187
——Stanley, (D. R.) 104
Wave detectors:
——Boltmeter used as. By Tissot, (D.) *616
——Ferraris. By Arno, (D.) *1205
——Walter & Ewing. By Walter, *602
Wave form, Influence of on the application of the two-wattmeter method. By Bloch, (D.) 145
Wave-length, New standard of. By Ives, 1068, *1074
Wave-length of free vibrations in antennae, 254; By Ives, 260
Wave meter. By Doenitz, (D. R.) 187
Waves:
——Light and electric waves. By Braun, (D.) 576
——Photgraphing alternating-current wave form, 162; By Spencer, *169
——Stationary electric. By Molloy, (D) 103; Fleming, (D.) 1203
Weather of 1912, 117
Weather and electricity, 758
Wehnelt interrupter, Simplified form of. By Van Dam, (D.) 332
Welding, Electric, (D.) 146
Welding aluminum. By Cowper-Coles, (D.) 105
Western Display Co. Electric signs, *372
Western Society of Engineers merged with Chicago Electrical Association, 386
Western Union Telegraph Co.:
——Financial statement, 1164
——Poolrooms, 853, 904
Westinghouse, George, Sketch of, 46
Westinghouse Electric & Manufacturing Co.:
——Auto-starter, *1135
——Circuit-breaker, *372
——Controllers, *492
——Lightning arrester, *1137
——Measuring instruments, Portable, *1097
——Oil switch, *243
——Power-factor meter, *664
——St. Louis exhibits, *1131
——Switchboard instruments, *1040
——Transformer primary cut-out, *620
——Transformers, *580
Weston cell. By Barnes and Lucas, (D.) 780
White lead, Electrolytic preparation of, 735
Wilkinsburg Electric Club, *273
Willard Co. Storage battery, *1170
Winding calculations. By Guilbert,
Winding machines, Electric, By Georgi, (D.) 741
Wire ropes, Construction and uses of, (D. R.) 778
Wireless telegraphy:
——Blockmann radiotelegraph system. By Collins, *132
——Brazil, 367
——De Forest system, English test of, *54
——Fessenden patents, *570
——Government control of, 1068, 1078, 1111, 1114, 1200
——Improvements since 1896. By Collins, (D.) 1168
——Marconi system, Annual report on, 707
——Marconi work, 180
——Measuring the wave length. By Drude, (D.) 282
——Nickel in the core of the Marconi magnetic detector, (D.) 919
——Receiver. By Karpen, (D.) *780
——Resonance transformers, Design of. By Seibt, (D.) 919
——Review of 1903, 3
——Self-cohering receiver. By Van Winkle, *994
——Tesla's experiments. By Tesla, *429
——Tests by U. S. Government, 108
——Theories, *41; By Blondel, 48, 118, 572, 593; Fessenden, 227; Taylor, 278, 405; Wagner, (D.) 281; Hettinger, (D.) 744
——Transmitter energy, Methods for increasing. By Braun, (D.) *919
——U. S. Army, 389
——Variation of potential along the transmitting antenna. By Chant, (D.) 282
——War messages, 745, 759, 760
——Wave length of free vibrations in antennae, 254; By Ives, 260
——Wave measurements, "Multiplier" for. By Slaby, (D.) *52
Wires, Overhead high-tension, in California cities, (D. R.) 779
Wiring:
——Calculating networks. By Müllendorff, (D.) 881, 918; Verhöckx, (D.) 881
——Earth connections. By Moon, (D.) 703
——Government Printing Office, *83
——Localization of faults on low-tension networks. By Groves, (D.) *882
——Testing networks, (D.) 918
Wisconsin Independent Telephone Association, 404
